RE: Approval, Industrial Area, Sampling and Analysis Plan, FY03 Addendum, IA#-03-09, IHSS Group
600-4, August 2003

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the Division) has reviewed, and hereby approves, the subject sampling and analysis plan addendum. A draft of the addendum, also dated August 2003, was reviewed and minor comments were resolved with facility representatives. A copy of the Division's written comments is attached for reference.

It has been agreed that any concern related to Dioxins and Furans would be due to a general association with PCBs. Consequently, analysis for these potential COCs, if any, will depend upon the results of a PCB evaluation in the southwestern corner of the IHSS.

If you have any questions regarding this correspondence, please contact me at (303) 692-3367, Harlen Ainscough at 303-692-3337.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator

Draft Industrial Area

Sampling and Analysis Plan

FY03 Addendum #IA-03-09

IHSS Group 600-4

August 2003

Specific Comments:

1. **Table 2: Location Codes** CA35-000A (page 5) and CA36-025A (page 13) are listed for Dioxins & Furans analysis. The Division was unable to locate information in the HRR or IASAP to support such analysis or at these specific locations. Please verify the need and, if appropriate, include a discussion in the narrative.
2. Beginning with CA37-001B (page 15) the VOC "B" interval is incorrectly shown as 0.0-0.5 feet. Please correct globally.
3. All borings surrounding CA37-002 are to be sampled to a depth of 4.5 feet to address contamination near the northeast corner of the IHSS, why not this one?
4. Please explain the rationale for excluding VOCs from the "C" and "D" increments of the northeastern borings.
